

## **Our Hands Change**

*About Us*

### Founder and Background

Our Hands Change was founded in 2018 by an animal welfare activist and ultra-endurance athlete with a passion to help save the world. Robert Newton, born and raised in Clymer, NY, moved to sunny Southern California in 2014. He set out on a five-year plan to chronicle his transformation from a virtual non-runner to an ultra-endurance athlete to bring attention to causes that matter, thus launching the project *Pushing 4 Change*. Serving as a visual timeline, Robert's ultimate goal was to show tangible evidence that small efforts can yield vast results given time.

Through Pushing 4 Change, Robert has raised thousands of dollars for several non-profit organizations all over the world and has participated in dozens of trail races, running hundreds of miles at a time for an organization or specific animal in need. As the project nears conclusion, Robert's dedication to saving the world has only grown stronger. Robert's solution was to transform Pushing 4 Change into a permanent channel for fundraising for causes in need of support.

### Our Hands Change Campaign

Our Hands Change was born with the purpose to help change the world, one cause at a time. The concept behind Our Hands is the idea that the power of positive change is in all of our hands. Each of us individually are capable of creating a world of unity and genuine goodness. Our hands are the tools we need to use together to evoke true, powerful change beginning with our own communities and ending with our world. Our future is our responsibility.

Items currently available for purchase are t-shirts, trucker hats and stickers. More apparel and accessories will be added to the line-up as Our Hands Change grows and more causes are added. Fifty percent of net profits from each purchase will benefit the cause to which the corresponding item represents.

Our Hands Change encourages the union of communities, teamwork within organizations and support to local businesses by engaging and interacting in the online Our Hands community.

All products are ethically made, humanitarian, vegan, and cruelty-free.
